

## WALLET CARDS

Below are cards that you can complete, cut out, and store in your wallet or purse. These cards are not legally binding and will not replace the document — they are simply to be used to locate your document, particularly in case of an emergency. Once you've entered the information, fold them down the center line. They will be the size of a credit card. To preserve the card, it is recommended that you laminate it. You can purchase do-it-yourself laminating sheets at most major chain retail and office supply stores.
